

Back2Back

Back2Back interprets three different types of natural stone.
For each of them, the series uses the distinctive features both of the face, the side normally chosen to form the visible floor covering, and of the concealed underside, where exquisite details are revealed.
Two sides of the same coin, with different personalities.

“... stone as muse and inspiration...”
“... versatile materials, tough surfaces...”
“... a selection of slabs for architectural projects...”

Back2Back interpretiert drei verschiedene Natursteine.
Die typischen Merkmale der Frontseite, der noblen Sichtseite des Bodenbelags, und der Rückseite, die kostbare verborgene Details offenbart, rücken in den Mittelpunkt.
Zwei Seiten einer Medaille mit unterschiedlichen Eigenschaften.

.... Stein als Inspiration...”
.... vielseitige Materialien, strapazierfähige Oberflächen...”
.... eine Auswahl von Platten für die Planung...”

La collection Back2Back interprète trois différents types de pierre naturelle.
Pour chacune d'entre elles, les éléments distinctifs de la face visible, constituée de la partie noble de la pierre, et de la face cachée qui renferme des détails d'une élégance rare, ont été valorisés.
Nous avons bel et bien affaire aux deux faces d'une même médaille possédant des identités dissemblables.

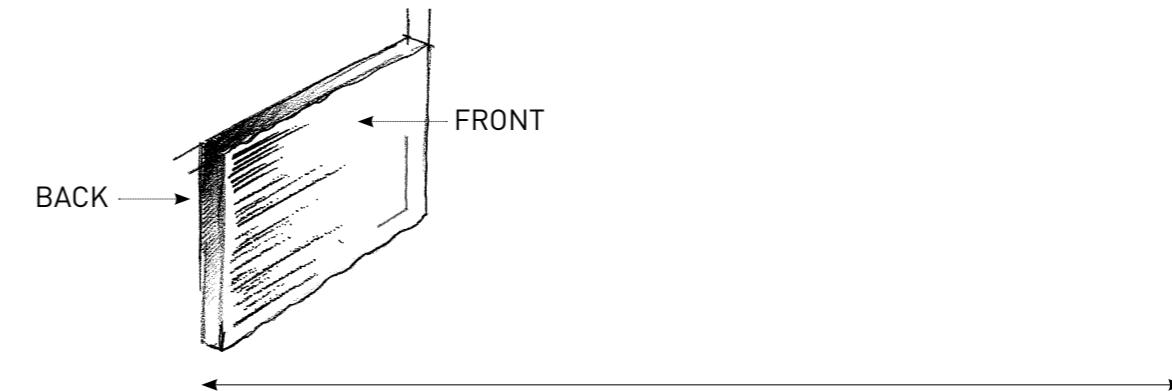

“... la pierre devenue muse inspiratrice...”
“...des matériaux polyvalents, des surfaces résistantes...”
“...une sélection de plaques servant à la conception...”

Back2Back interpreta tres tipos diferentes de piedras naturales.
Se ha dado valor a los elementos distintivos de cada una de ellas, tanto de la parte frontal, el área noble que queda visible al pavimentar, como de la parte de atrás, una superficie oculta de la que se revelan preciosos detalles.
Son dos caras de la misma medalla con caracteres diferentes.

“... la piedra como musa inspiradora...”
“... materiales versátiles, superficies resistentes...”
“... una selección de losas para proyectar...”

Back2Back по своему интерпретирует три разных типа натурального камня.
Для каждого из них подчеркиваются характерные черты как на лицевой и обычно находящейся на поверхности части, так и на невидимой тыльной стороне, которая также открывает интересные детали.
Две стороны одной и той же плиты, но с разным характером.

“... камень становится музой-вдохновительницей...”
“... универсальные материалы, прочные поверхности...”
“... ассортимент плит для создания проектов...”

Back2Back interpreta tre tipologie di pietre naturali differenti.

Per ognuna sono stati valorizzati gli elementi distintivi sia del fronte, della parte nobile normalmente esposta a pavimento, che del retro, con la parte nascosta che rivela dettagli preziosi.
Due facce della stessa medaglia con caratteri differenti.

“... la pietra come musa ispiratrice...”

“... materiali versatili, superfici resistenti...”

“... una selezione di lastre per progettare...”
